RESEARCH INTERESTS	Interested human preference learning, recommender systems, ranking systems, and learning from non-metric queries. Broadly interested in leveraging the learned representations of foundational models (generative models, large language models, etc.) for learning.	
EDUCATION	Georgia Institute of Technology <i>PhD in Electrical and Computer Engineering</i> Concentration: Digital Signal Processing and Machine Learning Advisor: Dr. Mark Davenport GPA: 4.00/4.00	Aug. 2019 - May 2024 (expected)
	University of Michigan, Ann Arbor <i>BSE in Electrical Engineering, Summa Cum Laude</i> Concentration: Digital Signal Processing GPA: 3.98/4.00	Sept. 2015 - May 2019

INDUSTRY EXPERIENCE	Duolingo , Pittsburgh, PA <i>AI Research Intern, Learning AI Lab</i>	May 2023 - August 2023
	Amazon , San Francisco, CA <i>Applied Scientist Intern, Amazon Style</i> <ul style="list-style-type: none">Investigated pixel-wise labeled synthetic dataset generation with generative adversarial networks (GANs). Leveraged GAN inversion to utilize existing labeled images for label generator training. Achieved state-of-the-art performance in faces, cars, full-body humans, urban driving domains on semantic segmentation, keypoint detection, depth estimation tasks.Project resulted in the first full conference publication for the Amazon Style organization: Paper accepted at CVPR as a Highlight Award (top 2.5% of submissions, top 10% of accepted papers). Workshop version presented at NeurIPS.	May 2022 - December 2022

- Developed variance-maximization algorithm for selecting initial items to be shown to users for binary like/dislike ratings (cold start problem). Experimented combinations of CLIP and model embeddings to determine embedding to maximize inter-and intra-category variance.
- Designed and implemented data fidelity experiments which exposed recommendation model embedding shortcomings. Findings handed off to management for review, potentially leading to a massive simplification of training pipeline and user experience.

Sandia National Laboratories, Albuquerque, NM

May 2018 - Aug. 2018

Undergraduate R&D Intern, Flight and Instrumentation Systems Group

General Motors, Warren, MI

May 2017 - Aug. 2017

Student Intern, Automated Driving and Active Safety Group

RESEARCH EXPERIENCE

Georgia Institute of Technology, Atlanta, GA

Advisor: Mark Davenport

Learning from parametric adjustment queries.

2021 - present

- Investigating robust metric learning under non-parametric human noise models from novel parametric adjustment queries. Developing sample complexity guarantees using techniques from high-dimensional statistics and low-rank matrix sensing.

Deep metric learning from nearest-neighbor queries.

2020 - 2022

- Developed information-theoretic criterion for adaptive selection of a novel nearest neighbor query. Query responses directly improve learned embeddings, allowing for direct application of adaptive query selection to both active deep metric learning (DML) and active classification.
- Implemented DML experiments (python) which outperformed recent active DML approaches on synthetic and real-world datasets (food-100, Georgia Tech graduate student admissions).

Simultaneous preference and metric learning from paired comparisons.

2019 - 2020

- Developed novel joint ideal point and Mahalanobis metric estimation algorithm from paired comparisons. Utilized alternating minimization to iteratively refine initial estimates.
- Implemented ideal point estimation on synthetic and real-world datasets (Georgia Tech graduate student admissions), resulting in interpretable learned metrics and ideal points.

University of Michigan, Ann Arbor, MI

Advisor: Laura Balzano

- Investigated use of order-weighted L1 (OWL) norm for determining relevant features for learning human preferences from paired comparisons. Characterized effects parameter tuning for OWL norm for promoting group sparsity.
- Developed algorithm to perform blind sensor calibration for data drawn from time-varying low-rank subspaces. Alternated sensor gain learning via Total Least Squares and subspace estimation via GROUSE. Achieved $< 5\%$ sensor calibration error with good initialization.

PRESENTATIONS

“HandsOff: Labeled dataset generation with no additional human annotation.”
ML Collective Deep Learning: Classics and Trends reading group | Virtual.

June 2023

“HandsOff: Labeled dataset generation with no additional human annotation.”
Georgia Tech Center for Signal and Information Processing (CSIP) Seminar | Atlanta, GA.

April 2023

“HandsOff: Labeled dataset generation with no additional human annotation.”
Neural Information Processing Systems (NeurIPS) SyntheticData4ML Workshop | New Orleans, LA.

December

“Simultaneous Preference and Metric Learning from Paired Comparisons.”
Neural Information Processing Systems (NeurIPS) Spotlight Presentation | Virtual.

Dec. 2020

WORKSHOPS

Gene Golub SIAM Summer School: “Theory and Practice of Deep Learning.”
African Institute for Mathematical Sciences (AIMS) | Virtual.

2021

TEACHING EXPERIENCE	Head Graduate Teaching Assistant Statistical Machine Learning (ECE 6254) Georgia Institute of Technology.	Spring 2022
	Graduate Teaching Assistant Professional and Technical Communications (ECE 3005) Georgia Institute of Technology.	Fall 2019 - Summer 2020
	Instructional Aide Discrete Mathematics (EECS 203) University of Michigan.	Fall 2018, Winter 2019
AWARDS	Machine Learning at Georgia Tech Fellow Georgia Institute of Technology.	2021
	President's Fellowship Georgia Institute of Technology.	2019
	Distinguished Academic Achievement Award University of Michigan.	2019
	Outstanding Service Award, EECS Dept. University of Michigan.	2018
	EECS Scholar University of Michigan.	2018
	Eta Kappa Nu Scholarship University of Michigan.	2017
	UROP Outstanding Research Presentation Award University of Michigan.	2017
	James B. Angell Scholar University of Michigan.	2017
	William J. Branstrom Freshman Prize University of Michigan.	2016
SERVICE	Dean's List/University Honors University of Michigan.	2015 - 2019
	Undergraduate Engineering Student Advisory Board <i>Electrical Engineering Representative</i> University of Michigan.	2018 - 2019
	Eta Kappa Nu - Beta Epsilon Chapter <i>Officer - Historian, Tutoring Chair</i> University of Michigan.	2018
	ECE Undergraduate Advising Office <i>Peer Advisor</i> University of Michigan.	2017 - 2018
